EXPERIENCE

Android Application Developer Intern | | Spaak Kai LLP

April 2026 - May 2026

- Developed a **Virtual Try-On** Android application using Kotlin and Jetpack Compose, focusing on modern UI design and a responsive user experience.
- Implemented **MVVM (Model-View-ViewModel)** architecture and Jetpack Compose state management to build a scalable, maintainable, and modular codebase.
- Integrated **Supabase** for backend data management, enabling efficient data storage, retrieval, and synchronization through **RESTful APIs**.
- Followed clean architecture principles and modular development practices to improve code reusability and simplify future feature enhancements (project currently in development phase).

Community and Outreach Intern | | Hack2skill

September 2024 - November 2024

- Promoted technical challenges and hackathons by engaging with **developer communities** and driving participation through targeted outreach.
- Managed community communications and announcements across platforms, contributing to a **30% increase** in user engagement and participation.
- Collaborated with cross-functional teams (marketing, tech, and operations) to execute **campaigns, streamline outreach strategies, and enhance event visibility**.

PROJECTS

TrackMyBus – Real-Time Bus Tracking System ([Github](#))

Skills: Kotlin, Jetpack Compose, Spring Boot, PostgreSQL, Firebase FCM, REST APIs

- Built a full-stack real-time bus tracking app for students and drivers using **Kotlin, Jetpack Compose (Android), and Spring Boot + PostgreSQL (backend), deployed on Render Cloud**.
- Implemented live GPS tracking via foreground services with role-based auth for students and drivers, covering trip lifecycle, route, stop, and occupancy management.
- Integrated **Firebase FCM** for real-time push notifications on trip status updates and developed backend **REST APIs** using Spring Boot, **Hibernate/JPA, and PostgreSQL**.
- Published on **Google Play Console** with closed testing, foreground location permission compliance, and privacy policy setup — handling full release management end to end.

ResQ – Emergency Response App ([Github](#))

Skills Acquired-Kotlin, Firebase, ML Kit, Jetpack Compose

- Developed an emergency response Android app with Google ML Kit QR scanning.
- Integrated Firebase Realtime Database syncing critical medical data across 2 user roles (Doctors & Police) with under 1 second latency.
- Engineered a role-based access system ensuring only authorized personnel can view sensitive patient data during emergencies.

Pregnancy Vitals Tracker with Reminders([Github](#))

Skills Acquired- Kotlin, Jetpack Compose, Room DB, WorkManager

- Built offline-first health app using Room Database for secure local storage of medical logs with no internet dependency.
- Implemented WorkManager for reliable periodic reminders for medication and check-ups, persisting even after device reboots.
- Designed UI with Jetpack Compose and MVVM, cleanly separating UI state from business logic for maintainable code.

SKILLS & INTERESTS

- Languages: Kotlin, Java, C++
- Android Framework: Jetpack Compose, XML, Activity/Fragment Lifecycle, Navigation Graph
- Architecture: MVVM, Clean Architecture, Repository Pattern
- Networking & Async: Retrofit, REST APIs, OkHttp, Kotlin Coroutines, Flow, LiveData
- Data & Cloud: Firebase (Authentication, Firestore, Realtime Database, Cloud Messaging), Room Database, SQLite, DataStore, Supabase, PostgreSQL
- Backend : Spring Boot, Hibernate/JPA, Render Cloud
- Tools: Android Studio, IntelliJ IDEA, Git, GitHub, Gradle, Google Play Console, Logcat, Postman, Android Studio, Git/GitHub, Gradle

Education

Bachelor of Technology (Computer Science) : Guru Gobind Singh Indraprastha University
Nov 2022 – June 2026
