EXPERIENCE

Android Developer Intern | Appsuccessor Media Pvt. Ltd Aug 2026 - Present

- Enhanced Weltru's Kotlin-based Android app by integrating Health Connect, optimizing app startup, and improving performance through caching and parallel data loading.
- Developed REST APIs using Kotlin, Spring Boot, and Supabase PostgreSQL for workout splits, exercises, sessions, and sets, implementing CRUD operations and database integration.
- Integrated backend APIs with Jetpack Compose UI, implementing workout state management, synchronized timers, local data persistence, and batch synchronization for reliable workout tracking.

Community & Outreach Intern | Hack2skill Sep 2024 - Nov 2024

- Drove developer engagement & hackathons; achieved 30% increase in user participation and community interaction.
- Executed cross-functional marketing campaigns improving event visibility and outreach strategy effectiveness.

PROJECTS

Weltru — Smart Health Analytics Android App

Tech: Kotlin, Jetpack Compose, MVVM, Health Connect API, Unit Testing, Spring Boot

- Designed a 4-table PostgreSQL schema and developed REST APIs for workout splits, exercises, sessions, and sets, implementing CRUD operations with structured database integration.
- Optimized workout execution with local-first state persistence and batch API synchronization, reducing unnecessary network calls during set logging and syncing changes on user save.
- Implemented session recovery, stable exercise state tracking, and synchronized workout/rest timers to prevent duplicate sessions, preserve progress across app restarts, and ensure consistent UI-backend data synchronization.

Trending Now — Android News Application

Tech: Kotlin, Android, Retrofit, REST APIs, MVVM

- Built API-driven news content retrieval with Retrofit and REST APIs.
- Structured application components using MVVM to separate UI and data-access responsibilities

TrackMyBus — Real-Time GPS Bus Tracking System

Tech: Kotlin, Jetpack Compose, Spring Boot, PostgreSQL, Firebase FCM, REST APIs, Clean Architecture

- Developed a real-time bus tracking app with live GPS, role-based login, and trip management.
- Built Spring Boot REST APIs and integrated PostgreSQL and Firebase Cloud Messaging.

TECHNICAL SKILLS

- Languages: Kotlin
- Android: Jetpack Compose, XML, MVVM, Clean Architecture, Hilt, Navigation Component
- Asynchronous Programming: Coroutines, Flow, LiveData
- Networking: Retrofit, OkHttp, REST APIs, JSON
- Databases & Cloud: Room, SQLite, Firebase, Supabase, PostgreSQL, DataStore
- Backend: Spring Boot, Hibernate/JPA
- Tools: Android Studio, Git, GitHub, Gradle, Postman, Google Play Console

EDUCATION

B.Tech Computer Science | Guru Gobind Singh Indraprastha University, Delhi | 2022 - 2026
