PROFESSIONAL SUMMARY

Android Developer with expertise in Kotlin, Jetpack Compose, and MVVM architecture. Proficient in building real-time systems using Firebase, Spring Boot, and REST APIs. Strong foundation in Clean Architecture, Dependency Injection (Hilt), and scalable mobile app development for quick commerce platforms.

EXPERIENCE

Android Application Developer Intern | Spaak Kai LLP

Apr 2026 - May 2026

- Developed Virtual Try-On Android app using Kotlin & Jetpack Compose with MVVM architecture and responsive UI design.
- Integrated Supabase backend with RESTful APIs for real-time data synchronization and state management using Jetpack Compose.

Community & Outreach Intern | Hack2skill

Sep 2024 - Nov 2024

- Drove developer engagement & hackathons; achieved 30% increase in user participation and community interaction.
- Executed cross-functional marketing campaigns improving event visibility and outreach strategy effectiveness.

PROJECTS

SmartProductSDK – Intelligent Grocery Substitution Engine ([Github](#))

Tech: Kotlin, Android SDK, Rule-based Ranking Algorithm, Dependency Injection

- Developed an Android SDK that recommends intelligent grocery substitutions using 8+ matching factors, including brand affinity, category, quantity, price, and product attributes.
- Designed an explainable recommendation engine supporting 300+ products for quick-commerce platforms.
- Built reusable, modular SDK architecture for seamless integration into Android applications.

TrackMyBus – Real-Time GPS Bus Tracking System ([Github](#))

Tech: Kotlin, Jetpack Compose, Spring Boot, PostgreSQL, Firebase FCM, REST APIs, Clean Architecture

- Developed a real-time bus tracking app with live GPS, role-based login, and trip management.
- Built Spring Boot REST APIs, integrated PostgreSQL and Firebase Cloud Messaging, and published on **Google Play**

ResQ – Emergency Response App with ML Integration ([Github](#))

Tech: Kotlin, Firebase Realtime Database, ML Kit, Jetpack Compose, MVVM

- Built an emergency app using ML Kit QR scanning and Firebase Realtime Database.
- Implemented secure role-based access for Doctors and Police with instant data retrieval.

TECHNICAL SKILLS

Languages: Kotlin, Java, C++

Android Framework & Architecture: Jetpack Compose, XML, MVVM, Clean Architecture, Repository Pattern, Dependency Injection (Hilt), Navigation Component, Activity/Fragment Lifecycle

Async & Concurrency: Kotlin Coroutines, Flow, LiveData

Networking & APIs: Retrofit, REST APIs, OkHttp, API Integration, JSON

Data & Cloud Services: Firebase (Authentication, Firestore, Realtime Database, Cloud Messaging), Room Database, SQLite, DataStore, Supabase, PostgreSQL

Backend & Server: Spring Boot, Hibernate/JPA, Render Cloud

Development Tools & Practices: Android Studio, Git, GitHub, Gradle, Google Play Console, Logcat, Postman, Agile, SOLID Principles, Material Design, UI/UX

EDUCATION

B.Tech Computer Science | Guru Gobind Singh Indraprastha University, Delhi | 2022 - 2026
